Systanet Limited

What we do

Systanet Limited is a technology and innovations company that has been engineering new technology implementations since 1999. We take inventions, concepts, and creative business ideas and apply appropriate technology to bring them to life.

Years of experience, and breadth of application, built on solid design, hardware, and software engineering skillsets means that we can consider and select the most appropriate and cost-effective technologies to bring a new idea to life.

Our customers

Our customers vary in size but have the common theme of being at the leading edge of invention and innovation. They include major international businesses, such as Westinghouse Rail Systems and Railtrack/Network Rail, to small independent startups such as HotLog and AutoSpeedWatch Limited

Our service provision and product development

Our flexible programme management and project resourcing infrastructure means we can deliver projects with a precise balance of Value, Speed, and Quality according to your specific requirements. We use our massive pool of resource to apply the appropriate expertise in the right place and at the right time.

The team

The company has a portfolio of over 3500 specialist contract engineers as its virtual resource, across all disciplines of hardware, and software engineering, and spreading into safety management, mechanical, process design, infrastructure management and other disciplines. We apply this resource on a case-by-case basis, with strong project management controls, to provide highly reactive bespoke pools of targeted engineering resource.

Contact

Contact us to discuss your requirement. We also have resources and networks of innovation project finance support to help get startups off the ground.
